

AI.Consultation – Initial personal consultation with AI experts

Are you planning to implement AI solutions in your company, but are still unsure how best to approach it?

With the KI.NRW AI.Consultation, we offer companies in North Rhine-Westphalia a 30-minute discussion format to clarify key questions about getting started with AI. For example, do you have a specific question about a planned AI project? Or are you generally interested in the topic of artificial intelligence, but do not yet have a clear idea of how you want to use AI in practice? We look forward to talking to you and taking the next steps on your AI journey together. To this end, we recommend our ongoing AI consulting services, which build on each other. You can find more information in this leaflet.

Find out more about KI.NRW

With KI.NRW, we are developing North Rhine-Westphalia into one of the leading locations for applied artificial intelligence and supporting small and medium-sized companies in identifying their AI potential and putting it into practice.

Based at Fraunhofer IAIS, one of the leading research institutes in the fields of artificial intelligence, machine learning and big data in Germany and Europe, we can draw on the latest research findings and share our expertise with companies.

KI.NRW is funded by the state government of North Rhine-Westphalia.

**AI.Kick-off –
Introductory presentation
on Artificial Intelligence**

Would you like to understand the concept of artificial intelligence and how the terms AI, machine learning and more are connected?

In about 90 minutes, you will get an overview of the basics of artificial intelligence. You will learn how the terms artificial intelligence, machine learning, large language models and AI agents are connected, but also what opportunities and challenges are associated with them. We underpin the topics with many visual examples and find areas of application that are suitable for your company. The interactive presentation is aimed especially at larger groups.

**AI.Shadowing –
On-site use case identification
and evaluation**

Do you already have some initial ideas about how artificial intelligence could be used in your company, but would like to explore all the potential first?

As part of AI.Shadowing, our AI experts help you structure your ideas. To do this, we work with you to identify AI potential in the form of use cases that are individually tailored to your company. Once we have defined possible AI applications, we work with your employees to evaluate them based on various factors in order to prioritise them. AI.Shadowing is a hybrid format consisting of an online meeting and an appointment at your company.

**AI.DeepDive –
Artificial Intelligence
from idea to practice**

Have you already identified use cases for AI in your company and would now like to implement a particularly promising one?

As part of the online format, we work with your company to develop a customised concept for your AI idea. The AI.DeepDive takes place in two to three sessions of two hours each. In these sessions, we examine the feasibility of the selected use case, answer questions and advise you on planning the next steps. We act as your sparring partner and guide you through the process using a proven approach. Your company benefits from the many years of experience of our AI experts.
